WORK EXPERIENCE

Architect   **Jan. 2014 – Present**

- Meeting with clients to understand their needs and requirements. Creating detailed drawings and plans, including blueprints and 3D models, to visually communicate the design.
- Working with engineers and contractors to ensure the design is feasible and meets building codes and regulations.
- Conducting site surveys and analysis to determine the feasibility of the proposed project.
- Overseeing the construction process to ensure that the work is completed on time and to the required standards.
- Specifying materials, systems, and equipment to be used in construction.
